ServiceNow, Miyo, Integrate

TIISETSO MMOLA (FG-9-ZA-17)

Software Developer

ABOUT ME

BSc IT graduate and BMW Intern Software Developer with hands-on enterprise app development and workflow automation experience. Currently enrolling for BSc Honours in Computer Science at UP, eager to join BMW's Graduate Tech Academy Programme to drive automotive digital innovation.

EXPERIENCE

BMW Software Developer

intern(Yes4Youth Programme)

2025- 2027

SCP Apps Software development platform

1. Enterprise Application

Development & Maintenance:

- Develop BMW web apps using TypeScript, React, GraphQL, and Node.js on SCPapps.
- Build apps with BMW data integration using MongoDB and PostgreSQL.
- Accelerate development using SCPapps SDK and reusable pre-built components.

2. Testing, Quality Assurance & Defect Reporting:

- Test applications for quality, performance, and reliability.
- Identify, document, and report defects, collaborating with teams to resolve issues.

3. Technical Support & Incident Management:

- Troubleshoot and resolve application creation, GraphQL, and authentication issues for platform users.
- Manage ServiceNow support tickets, ensuring timely resolution and SLA compliance.
- Document solutions and create troubleshooting guides for cache management and API integration.

Hackathon Participant – Community Resource

2023

- Developed a functional prototype for a community resource app within a 48-hour hackathon.
- Focused on UI/UX design and API integration, collaborating with a team to deliver a working solution under tight deadlines.
- Demonstrated rapid problem-solving, teamwork, and adaptability in a high-pressure environment.
